Quality | Style | Choice

Tenon Partition Systems is a leading brand of high quality partitioning products. The Tenon range offers specifiers the entire spectrum of advanced partitioning systems. Whatever a building or refurbishment project demands, from straightforward sound or vision screening to a complex multi-functional specification, there is a Tenon solution tailored for any purpose.

Tenon products are designed and manufactured to meet the most exacting quality standards. Attractive and superbly finished, Tenon products have an excellent reputation established over many years. Furthermore, the company continually researches and develops the new ideas that ensure its position at the forefront of the industry.

Included in our design and supply packages are wall coverings, door furniture, blinds, glazing and glass manifestation.

To compliment and enhance the appearance of the product, a full array of Tenon door and joinery services are available together with the Nexus range of ironmongery.

Scion

Tenon Scion combines the visual appeal and luxurious finish of natural wood with the flexibility and performance of a contemporary partition system.

The system is ideal for use in boardrooms and executive areas but also affords a practical and durable solution for general office areas. Scion is manufactured from solid timber using an attractive range of sustainable hardwoods and other suitable timbers, allowing endless design and build options.

Built to a patented method of construction, Scion is simple to install while still meeting the most demanding of design briefs. Available in single and double glazed formats the system can incorporate silicone glazing and integral Venetian and vertical blinds.

*Fire Rating: 30 and 60 minutes to BS 476 pt22 doors, glazing and solid modules including insulated glazing.
Sound Rating: From 34dB R_w to 52dB R_w on solid modules*

Ovation

Tenon Ovation is a state-of-the-art partition system designed to remain at the forefront of partition development.

Ovation's styling provides gently radiused upright posts and door frames with a choice of recessed or flush skirting. Standard module widths are 1209mm. Glazed elements include an innovative integral transom feature providing a cost effective option to standard banded glazing.

An almost unlimited choice of RAL or BS colour finishes offer the potential to tailor installations to suit any corporate environment. Innovative Bi-element construction allows rapid on-site assembly without lengthy lead times. Demountability and relocatability are possible with the push fit interpanel trims.

Fire Rating: 30 minutes to BS 476 pt22 doors, glazing and solid modules

Sound Rating: Solid elevations up to 43dB R_w

Glazed elevations up to 42dB R_w

Load Testing: Medium duty classification to BS 5234

*Creative use of Ovation
provides the building
blocks for today's
discerning client.*

A partition system that combines function with the clear, aesthetic benefits of silicone glazing

Vitrage

Tenon Vitrage is a partition system that combines function with the clear, aesthetic benefits of silicone glazing. Using a minimum number of aluminium framing sections, Vitrage provides an office divide that allows unhindered vision while still maintaining the privacy of individual offices.

Using either 10mm or 12mm toughened glass depending on the height of the partition; glazing is achieved with the use of standard Tenon crystal clear glazing gaskets that remove the need for use of silicone around the perimeter of the system. Vertical silicone joints maintain the visual simplicity of the product, whilst crystal clear plastic jointing sections may be used to provide dry joints between glass panels.

fire & sound tenon

Fire & Sound

Tenon Fire & Sound is a highly versatile demountable and re-locatable office partition system designed for use in both general office and light industrial areas and is constructed from steel, aluminium and plastic profiles and plasterboard panels.

The system offers a high degree of choice in design options coupled with high performance and aesthetics in both single and double glazed formats.

Standard module width is 1200mm. Maximum construction height is determined by the choice of upright framing sections and module type, reaching a maximum height of 4200mm using standard components.

Constructed with a galvanised steel sub frame, the aluminium framing sections are available in a silver anodised finish together with a range of twelve standard colours.

Fire Rating: 30 and 60 minutes to BS 476 pt22 doors, glazing and solid modules.

Sound Rating: From 34dB R_w to 52dB R_w on solid modules

Tenon Fire & Sound is well established as one of the most popular performance partition systems available.

Tenon Flexplus is a fully demountable and re-locatable multi-purpose aluminium partition system that is simple and quick to install.

Flexplus

Tenon Flexplus provides a cost effective and versatile range of partitioning for use in office environments where a simple, practical office divide is required.

The system is constructed from a range of aluminium upright posts and gypsum plasterboard faced honeycomb panels and is fully demountable and re-locatable.

Available in both single and double glazed formats, Flexplus can accommodate 15mm and 25mm integral Venetian blinds and may be supplied in a silver anodised finish or a range of twelve standard colours.

Based around a standard module width of 1200mm, Flexplus can be used to create partitions from barrier height up to 6000mm.

*Non Fire Rated: standard construction
Sound Rating: 29db R_w on solid & glazed modules*

wall store

tenon

Wall Store

Tenon Wall Store is a simple but very effective concept, which utilises ceiling height modular units to provide an integrated wall and storage partition. The system provides compact and streamlined storage which can be used as both free standing room dividers or as partition walls for cellular offices.

Demountable and relocatable Tenon Wall Store is an ideal solution for high density storage. It has been designed to integrate with and to complement the complete range of Tenon partitioning systems.

Non Fire Rated

*Fully demountable and
relocatable, providing
compact and
streamlined storage*

operable walls

tenon

Operable Walls

The **Tenon Operable Wall** range offers an unrivalled choice of quality engineered moveable partitions that provide effective space management.
